Ciclo di conferenze  
*Lecture di architettura*

Giovedì 28 maggio 2009  
Ore 16,00 - 19,00  
Aula D3

## Vicente Guallart

Vicente Guallart (Valencia 1963) is one of the most relevant emerging architects in Spain. He opened his studio in Barcelona in 1992. He works in the confluence of architecture, nature and new technologies. Some of his more relevant projects are the Denia Mountain (reconstruction of an old quarry, in an environment that hold an old Arab castle, selected for the Venice Biennale 2004), 3 ports in the North of Taiwan that will improve the tourism in the island (winners of 2 international competitions), or the Sharing Tower in the neighborhood of la Torre (Valencia).

He spent part of his time with research and educational projects as director of the new Institute for Advanced Architecture of Catalonia (laac), in Barcelona, that hold an international postgraduate program on architecture and urbanism working in many scales "from Bits to geography" ([www.iaacat.com](http://www.iaacat.com)). In 2000 he co-directed with MIT's Media Lab and other research Center, the Media House Project, the prototype of an informational house, based, as first time, in distributed computation. He is author of the master Plan of the project Sociópolis, an innovative housing project in Valencia that allows the urban development and the protection of the agriculture environment. He coordinates a group of international architects that will build different equipments and housing projects in this neighborhood. This project was shown in the Valencia Biennale, or the Arkitektur Zentrum in Vienna. It will be build for the year 2007. He is co-author of the Metapolis Dictionary of Advanced Architecture (Actar), HiperCatalonia, or Media House Project. The Korean publishing house DD dedicates the monograph "Intelligent realities" to his work. Actar publishing house is preparing his new book "Media, Mountains and Architecture".

He have given lectures in different Universities and Cities around the world as Princeton University, Upen, Architectural Association, UCLA, MIT, Space (Seoul), Taipei and others. His work has been exhibit in the "Biennale di Venezia" 2002, 2004 and 2006, "Gratz," "Bienal Internacional de Arquitectura de São Paulo" 2007, MACBA, IVAM, MoMA, Archilab, Gratz and others.
